ABOUT IEM...

IEM International Electronics Marketing...

Acting as marketing agent for a vast network of overseas and domestic manufacturers IEM has the flexibility of bringing the right product or service for the right price to your company's design. We specialize in, but are not limited to, cable assemblies, bulk cable, power supplies, batteries, cooling solutions, metal and plastic parts/tooling and motors.

Our approach has always been to understand what the customers problems are, and then offer manufacturers to fill the solution. Through our network of world class manufacturing partners and our own "in house" sister companies of DEVA (www.devainc.com)and Veterans Supply Chain Management (www.vscminc.com) IEM can and will find a solution for you. We have a large network of both Asian and Domestic suppliers offering: Batteries, Power Supplies under 150 watts, cabling and bulk cable, Displays, Fans, Metal and Plastic parts, Motors, PCB's and Electronic Contract Manufacturing Services.

Our factories can ship anywhere in the world. We can put your engineering team in direct contact with the team at the factory. We support the world's largest contract manufacturer's with our shipments. Should you have a need for both high volume shipments to your overseas CM's and also need smaller quick turn shipments for North American demand, DEVA or VSCM can warehouse for you.

If you are in need of facilitating government procurement requirements IEM can arrange for Veterans Supply Chain Management (V.S.C.M.) a "Service Disabled Veteran Owned Small business" to help.

So, regardless of your size, point of purchase or complexity of design IEM can help assure our products fit your design needs. Should you need additional value added work after the product leaves our factories IEM can arrange for a variety of domestic and Asian CM's to complete the work for you.

Give us a call.
